Chapter-4.0 WHAT THE BENEFITS ARE TO IMPLEMENTS ISMS?

Implementation of proper Information Security Management System as per requirement of ISMS standard improves organization to design and formulate its specific set of security requirements and desired objective. Organizations can use this standard to provide relevant information about information security policies, directives, standards and procedures to its trading partners as well as any other organization that they interact with for operational or commercial purposes. ISMS guidelines provide a comprehensive model for information security management systems that can make any company competitive. Among the wide advantages of the ISMS standard some of as follows:

- Lower Expenses – through avoided risks
- Increase information security level within the organization
- Enhance the knowledge and importance of security-related issues at all level and improve information security controls
- Improved visibility into your information security program & better security awareness
- Enhancement of client and partner confidence & perception of your organization
- Better alignment within your organization
- Assists in the development of best information security practice

C 106 – ISMS Awareness and Auditor training presentation kit

SAMPLE SLIDE

PART – 2

ISSUES FACED BY ORGANIZATION

- Attrition
- Data Corruption/ integrity issues
- Crashing of Critical Server/ Hardware
- Link Failure
- Back up Restoration failure
- Low Performance
- Head Hunting
- Power Failures
- Environment Hazards – Earthquake/Fire/ Flood/ Cyclone/ Sand Storms
- Civil Unrest
- Application failure/ Critical Bugs
- Cash Flow issues
- Outstanding
- Product / Service Failures
- Legal & Compliance Issues
